

NOTICE OF STUDENT'S RIGHT TO EDUCATIONAL INTERVENTION

The _____ has a process available that provides for the development and implementation of research based intervention procedures for students whose classroom performance is adversely affecting educational outcomes. The process entails defining the learning difficulty and developing an appropriate plan to address the concern within the regular education classroom.

The intervention plan is developed by a school-based team and a copy of the plan is shared with the parent. The plan will be reviewed at a specified date by the committee to determine whether it is a success or whether it needs to be redesigned, or whether an educational evaluation is necessary.

The educational intervention process has been explained to me and I choose to:

Withdraw my request for a formal educational evaluation and follow the educational intervention process.

Hold my request for an educational evaluation pending a review of the effectiveness of the educational intervention process for my child.

Proceed with the educational evaluation process.
